

Desert Survivors - WHAT WE STAND FOR

We stand for the preservation of desert lands - habitat, plants, wildlife, water, and scenery - in national parks, wilderness, wilderness study areas, national monuments, scenic areas, state/ local parks, wildlife refuges, and undeveloped areas.

What do we support?

- Protection of wildlife, native ecosystems, biodiversity
- Endangered species protection
- Wilderness protection laws and regulations
- Mitigation and restoration of damaged ecosystems
- Preservation of cultural artifacts and sites
- Public awareness and appreciation of desert lands
- Safe, low-impact recreation and exploration of desert regions

What do we oppose?

Activities and development causing an adverse impact on the above. Realizing that resource extraction, energy development, and population pressures in desert lands cannot always be avoided, we seek resolutions with the least possible adverse impacts.
